# Hahnemühle Signing Pen Duo

Hahnemühle's Signing Pen Duo helps artists to give their art an even more personal touch, to emphasize edition prints and to complete unique pieces. The classic black fineliner made of pure pigment ink can be used to sign on high-gloss paper surfaces without the signature bleeding through. The pigment liner is indelible, archival, waterproof, odourless, and lightfast. With its fine metal tip, even the most detailed signatures are possible.

To make images on matt and heavily textured paper unmistakable, our pigment liner comes in combination with a high-quality black graphite pencil in archival quality. The noble pencil is soft enough not to push through and hard enough to get the signature on the paper. Both signing pens are available in a modern black sliding case.
